

Software Engineer — Full Stack

Global Commercial Digital Innovation

EXPERIENCE LEVEL

2 – 6 years

EMPLOYMENT TYPE

Full-time

FUNCTION

Software Engineering

About the Role

We are looking for a motivated Full Stack Software Engineer to join our Digital Innovation team. This role is ideal for an early-to-mid career engineer who wants to work across the full stack — building user-facing applications as well as the backend services and cloud infrastructure that power them.

Key Responsibilities

- Develop and maintain front-end applications using HTML, CSS, and JavaScript frameworks (React preferred)
- Build and manage backend services using Python or Node.js, deployed on AWS cloud infrastructure
- Design and implement innovative solutions using modern technologies
- Collaborate closely with design and product teams to translate user needs into technical requirements
- Write clean, efficient, well-tested, and maintainable code
- Participate in code reviews and provide constructive feedback to peers
- Monitor and maintain system uptime and performance
- Stay current with new technologies and industry best practices

Required Qualifications

- Bachelor's degree in Computer Science or a related Engineering field
- 2–6 years of relevant professional experience
- Hands-on experience with front-end development: HTML, CSS, JavaScript
- Hands-on experience with backend development: Python, SQL, and NoSQL databases
- Strong problem-solving and analytical skills
- Excellent communication and teamwork abilities
- Ability to learn and adapt to new technologies quickly

Preferred Qualifications

- Cloud computing certification (AWS preferred)
- Experience with API integration, serverless architecture, and microservices
- Familiarity with vector databases and large language models (LLMs)
- Experience with LLM frameworks such as LangChain or LlamaIndex
- Exposure to prompt engineering or model fine-tuning
- Experience with CI/CD pipelines and DevOps practices

- Strong grasp of design patterns, data structures, and test-driven development

Soft Skills

- Strong analytical and troubleshooting ability
- Excellent verbal and written communication
- Comfortable working with global, distributed teams
- Self-motivated with a high degree of initiative
- Skilled at managing multiple priorities
- Team-oriented with a focus on shared goals
- Confident presenter with good public speaking skills
