

Company Name- Codesis Technologies Pvt Ltd

About the company

Codesis Technologies Pvt. Ltd. is a fast-growing IT solutions company building scalable, high-impact digital products across fintech, SaaS, and AI-driven ecosystems. We transform ideas into powerful, user-centric solutions through cutting-edge technology and innovation.

Location: *Mumbai and Hyderabad*

Designation: Backend Intern

Stipend: 10k to 17k (Depending upon the interview and skill set)

Role Overview

We are looking for a motivated **Backend Developer Intern (Python)** to join our engineering team. This role is ideal for students or recent graduates who are passionate about backend development and eager to build real-world applications.

You will work on developing **RESTful APIs, backend services, and scalable systems**, while gaining hands-on experience with modern technologies and best practices.

Key Responsibilities

- Assist in developing backend services using **Python**
 - Build and test **RESTful APIs**
 - Work with backend frameworks such as **Django, FastAPI, or Flask**
 - Support database design and integration (SQL-based systems)
 - Collaborate with frontend and DevOps teams
 - Debug issues and improve application performance
 - Write clean, maintainable, and well-documented code
 - Participate in code reviews and learning sessions
-

Required Technical Skills

- Basic knowledge of **Python programming**
- Familiarity with at least one framework: **Django / FastAPI / Flask**
- Understanding of **REST APIs and HTTP methods**

- Basic knowledge of **databases (MySQL/PostgreSQL)**
 - Understanding of **OOP concepts**
 - Basic Git/GitHub knowledge
-

Good to Have (Bonus Skills)

- Knowledge of **JWT authentication or API security basics**
 - Exposure to **async programming (FastAPI / asyncio)**
 - Basic understanding of **microservices architecture**
 - Familiarity with **Docker or cloud platforms (AWS/GCP)**
 - Experience with **Postman or API testing tools**
 - Personal or academic **projects on GitHub**
-

Eligibility

- Final-year students or recent graduates (B.Tech/B.E/MCA in CS/IT or related field)
 - Strong interest in backend development
 - Willingness to learn and adapt in a fast-paced environment
-

What You Will Gain

- Hands-on experience with **real-world backend systems**
 - Exposure to **production-level coding practices**
 - Mentorship from experienced engineers
 - Opportunity for **full-time conversion based on performance**
-

Ideal Candidate

- Has built **at least 1–2 backend projects**
- Can explain their **project architecture and APIs clearly**
- Shows strong **problem-solving mindset and curiosity**
- Takes **ownership and is eager to learn**
