Professional Summary

Hardworking and disciplined Computer Science undergraduate with a strong sense of ownership and consistent follow-through on commitments. Highly motivated, self-driven, and comfortable taking responsibility from day one, with a habit of staying focused under pressure and putting in the extra effort to get things done right. Learn from mistakes and always try filling gaps to get the best version possible.

Education

Bachelor of Technology — Computer Science and Engineering

2023 – 2027

KL University, Hyderabad, India

CGPA: 9.2/10

Skills

- **Programming Languages:** Java, C/C++, Python, PHP
- **Frameworks & Libraries:** Node.js, Express.js, Laravel, REST APIs, React
- **Databases:** MySQL, MongoDB
- **Tools & DevOps:** Git, GitHub, Postman
- **Software Engineering:** OOPs, DBMS, Computer Networks, SDLC
- **Frontend:** HTML, CSS, JavaScript

Experience

Logimetrix Techsolutions Pvt. Ltd., Lucknow

Feb 2026 – Jun 2026

Software Developer Intern

- Designed and delivered multiple production-grade web applications using PHP and Laravel, managing the full development lifecycle from database schema design and server-side logic through frontend integration and deployment; introduced reusable service modules that reduced average delivery time by 25% and improved long-term codebase maintainability.
- Developed and validated REST APIs using Postman across role-based access scenarios and edge cases; authored multi-table SQL queries for cross-module reporting and data validation, enabling accurate audit trails and reducing manual reporting effort by approximately 40%.

Projects

InfoSales — Enterprise Sales Functioning Platform

Tech Stack: Java, REST APIs, SQLite, React, Next.js, HTML, CSS, JS

- Developed a sales analytics platform that processes data from Excel files and transforms it into interactive business dashboards; implemented data extraction and processing logic to import, validate, and organize sales data from spreadsheets.

Spendora — Personal Expense Tracker

Tech Stack: Node.js, Express.js, SQL, JWT, Chart.js, JavaScript, CSS

- Built a full-stack expense tracker for managing income, expenses, and budgets; developed backend REST APIs with Express.js and MySQL, with a responsive JavaScript/HTML/CSS frontend.

PatientPilot (MediLingo)

Tech Stack: Next.js, Node.js, Express.js, MongoDB Atlas, Gemini API

- Built a healthcare application that simplifies prescription information and presents it in an easy-to-understand format for patients.
- Developed REST APIs using Express.js, stored prescription data in MongoDB, and created a React-based user interface for managing and viewing records.

Bulk Bazaar — Full Stack Ecommerce Platform

Tech Stack: Laravel, PHP, MySQL, Tailwind CSS, Blade

- Built a full-stack ecommerce platform with features including product management, shopping cart functionality, and order processing.
- Developed the backend using Laravel and MySQL while creating responsive user interfaces for customers and administrators using HTML and CSS.

Competitive Programming

- Participated in 200+ contests & solved 1500+ problems across different platforms.
- **Expert** @Codeforces (Profile) · **Knight** @LeetCode (Profile) · **3 Star** @CodeChef (Profile)
- Consistent top performer across all departments university-wide.

Achievements

- 2× Technical Hackathon Winner · Volkswagen Hackathon Semi-Finalist · Economic Times Hackathon Semi-Finalist
- Qualified GATE 2026 (CS&IT) · Organized IEEE Events, Research Events & Conferences

Certifications

- AWS Certified Cloud Practitioner (Foundations) — Amazon Web Services
- AWS Certified Solutions Architect (Associate) — Amazon Web Services
- GitHub Foundations · MongoDB Certified Associate Developer
- Oracle OCI — DevOps & Data Science Professional · Automation Anywhere Certified RPA Developer
- NVIDIA: Adding New Knowledge to LLMs · NVIDIA: Building LLM Applications with Prompt Engineering
