

EELAPANTI MYTHRI

Hyderabad, India

+91 7382401858 | eelapantimythri@gmail.com | [GitHub](#) | [LinkedIn](#)

Artificial Intelligence and Data Science undergraduate with strong interest in Machine Learning, Computer Vision and Full Stack Development. Passionate about building real-world applications using Python, Django and MERN Stack. Quick learner with hands-on experience in developing academic and personal projects focused on intelligent systems and problem solving.

Education

B.Tech in Artificial Intelligence and Data Science — CGPA: 9.3/10 <i>Koneru Lakshmaiah University</i>	2023 – 2027
Intermediate Education — 94.4% <i>TSBIE — Sri Chaitanya Junior Kalashala (59326)</i>	2021 – 2023
Class X — 87.4% <i>CBSE — Vidyanjali High School (57550)</i>	2021

Technical Skills

Programming Languages	Java, Python, C
Web Development	MERN Stack, Django, Spring Boot, HTML, CSS
Databases	MySQL, MongoDB
Machine Learning & Analytics	Machine Learning, Deep Learning, Data Visualization
Tools & Platforms	Git, GitHub, VS Code, Google Colab, Power BI, Tableau

Projects

Machine Learning & Computer Vision Projects

Smart Parking System | Python, OpenCV, Flask, React

- Developed a computer vision system to detect occupied and vacant parking slots using image processing and machine learning techniques.

Panoptic Segmentation Pipeline | TensorFlow, Flask, React

- Built a multi-stage image segmentation pipeline supporting semantic, instance, and panoptic segmentation with evaluation metrics integration.

Retinal Vessel Segmentation | TensorFlow, Flask, OpenCV

- Implemented a U-Net based medical imaging solution for retinal blood vessel segmentation and automated report generation.

Helmet Detection System | TensorFlow, OpenCV

- Developed an object detection model to identify helmet compliance for road safety monitoring applications.

Where's Waldo Object Detection | TensorFlow, Deep Learning

- Created a deep learning-based character detection system capable of locating target objects within complex images.

Full Stack & Web Development Projects

ConnectHub - Real-Time Chat Application | MERN Stack, Socket.io

- Built a real-time chat platform with authentication, instant messaging, and WebSocket-based communication features.

Educational Guide Portal | Django, SQLite

- Developed a full-stack educational survey and resource management platform with authentication and dynamic content handling.

Lost & Found Platform | Django REST Framework

- Created a REST-based lost and found platform with speech recognition support and item management functionalities.

Docling RAG | Flask, RAG

- Built a document processing and retrieval system that converts HTML documents into structured markdown for retrieval-augmented workflows.

Cloud Deployed MERN Backend | Node.js, Express

- Developed and configured a production-ready Express backend optimized for Render cloud deployment.

Data Science & MLOps Projects

Glass Classification MLOps Pipeline | Scikit-learn, Django

- Designed an end-to-end machine learning pipeline with preprocessing, model training, serialization, and deployment integration.

Microforecasting Application | Flask, Pandas

- Built a forecasting application for time-series analysis and predictive modeling using structured datasets.

Certifications

AWS Certified Cloud Practitioner

May 2026 — May 2029

Salesforce Certified Agentforce Specialist

Dec 2025 –

MongoDB Certified Associate Developer

Nov 2025 –

Automation Anywhere Certified Advanced RPA Professional

Sep 2025 — Sep 2027

Oracle Cloud Infrastructure 2025 Certified Architect Associate

Jul 2025 — Jul 2027

GitHub Foundations Certification

Dec 2024 — Dec 2027

Achievements

- Built and deployed 10+ projects across Machine Learning, Computer Vision, Full Stack Development, and MLOps using Django, MERN Stack, TensorFlow, Flask, and OpenCV.
- Earned globally recognized certifications from AWS, Oracle, Salesforce, MongoDB, Automation Anywhere, and GitHub in Cloud, AI, Database, and Automation technologies.
- Explored diverse domains including Medical Imaging, Real-Time Communication Systems, Forecasting, Segmentation Pipelines, RAG Systems, and Intelligent Automation Solutions.
